Fuel Tax Holidays

Due to rising fuel costs, some IFTA jurisdictions are allowing the purchase of eligible fuel tax exempt or pausing the collection of fuel taxes for a specified time period.

Manitoba (MB) has implemented its fuel tax holiday by reducing its tax rate to zero. Newfoundland and Labrador (NL) initially implemented their fuel tax holidays as a split tax rate in 2nd quarter 2022, but is now a reduction in the tax rate. ON has also implemented its fuel tax holiday as a reduction in the tax rate. The fuel tax holiday for each jurisdiction is listed below:

MB – January 1, 2024 to September 30, 2024

NL – June 2, 2022 to March 31, 2025

ON – July 1, 2022 to December 31, 2024

For information on fuel tax holidays, including examples on how to record fuel purchased and kilometres traveled during fuel tax holidays, please see 'Exempt Fuel and/or Kilometres' under *Help* on the left side of the page in *TAXcess*.

For more information on the jurisdictions participating in a fuel tax holiday as well as their contact information, please view the 'Important Notices' on the IFTA, Inc. website at <https://www.iftach.org/important-notice.php>.

Indiana – Fuel Tax on Electricity

Effective January 1, 2024, Indiana has implemented a fuel tax rate on electricity for use in electric vehicles (EV). The fuel tax rate is based on the taxable distance travelled on Indiana roads. The tax due for the use of electricity is calculated by multiplying Indiana taxable kilometres traveled by the Indiana tax rate.

For example, if a Manitoba carrier in an EV travels in Indiana, the tax due on electricity is:

Taxable Kilometres x EV Tax Rate
