## **Changes to Pharmacare and Employment & Income Assistance Drug Programs benefit coverage for Oxycontin (oxycodone CR) effective March 26, 2010**

Currently Oxycontin (oxycodone CR) 5, 10, 20, 40 and 80 mg tablets are eligible benefits under the Pharmacare and Employment & Income Assistance Drug Programs. Effective **March 26, 2010**, Oxycontin will move from Part 1 benefit status to Part 3 Exception Drug Status for Pharmacare and Employment & Income Assistance Drug Plans. This change will help to ensure benefit coverage for these drugs is only targeted to those patients who meet the established criteria recommended by an expert committee of physicians and pharmacists. In doing so, Pharmacare and Employment & Income Assistance Drug Programs will provide benefit coverage which is similar to that provided by most other provincial and territorial drug plans.

### **New patients starting Oxycontin therapy on or after March 26, 2010**

Effective **March 26, 2010**, Pharmacare and Employment & Income Assistance Drug Programs will require physicians to apply for Part 3 Exception Drug Status (EDS) coverage for all **new patients** starting Oxycontin therapy. Patients will be required to meet the following criteria before they will be considered for benefit coverage for Oxycontin.

1. Diagnosis of cancer related pain; PLUS  
Patients who are unable to tolerate or receive an adequate response to either the regular release dosage forms of oxycodone or the sustained release preparations of morphine or hydromorphone; OR
2. Pain management in a specified chronic pain diagnosis (details regarding patient's condition and previous medication history are required); PLUS  
Patients who are unable to tolerate or receive an adequate response to either the regular release dosage forms of oxycodone or the sustained release preparations of morphine or hydromorphone.

### **Patients currently on Oxycontin therapy prior to March 26, 2010**

Patients who have been on existing Oxycontin therapy prior to March 26, 2010 will be provided benefit coverage until **May 26, 2010**. Effective May 26, 2010, Pharmacare and Employment & Income Assistance Drug Programs will require Part 3 Exception Drug Status (EDS) be in place for a patient's Oxycontin therapy if they wish to have continued benefit coverage for this medication. The period between March 26, 2010 and May 26, 2010 will allow patients time to contact their physicians to apply on their behalf.
