

Naloxone kits distributed through the **Take-Home-Naloxone** program:

Manitoba (*total*): **232**

Naloxone kits shipped from provincial Materials Distribution Agency warehouse: **410**

Naloxone Distribution

Naloxone administration due to suspected opioid overdose:

Winnipeg Fire and Paramedic Service *: **225**

Medical Transportation Coordination Centre (May 21 – June 30, 2017): **9**

Take-Home-Naloxone program: **42**

* *Analyses include only those aged ≥ 9 years.*

Naloxone Administration

Hospitalization due to opioid poisoning: **33**

Emergency room admissions due to suspected overdose*: **411**

* *Winnipeg Health Region only*

Severity

Opioid-related deaths (*primary or contributing cause*):

2014: **94/175** deaths (54%)

2015: **85/182** deaths (47%)

2016: **80/146** deaths* (55%)

2017 (Jan – Mar): **30** deaths

In **14** of these 30 deaths in Jan – Mar 2017 (47%), fentanyl-related opioids were present, and in **12** of them (40%), the fentanyl analog carfentanil was present.

**subject to change*

Mortality

Rate (per 10,000) of individuals dispensed a prescription opioid from a community pharmacy (2016/2017 FY): **143.2**

Proportion of apparent opioid-related deaths where an opioid was dispensed within six months prior to death (Jan – Mar 2017): **80%**

Opioid Prescription - **NEW**

Fentanyl-related calls to Health Links–Info Santé: **2**

Opioid-related calls to Manitoba Poison Centre: **47**

Illegal opioids identified or tracked by Drug Analysis Service of Health Canada (Jan – Jun 2017): **139**

Others

During the 2nd quarter of 2017 in Manitoba, there was an increase in Naloxone kits used in overdose events, suspected overdoses cases arriving at Winnipeg Health Region emergency departments, and suspected overdoses cases receiving naloxone from Winnipeg Fire and Paramedic Service as compared to the 1st quarter of 2017. Carfentanil-related deaths continue to contribute significantly to opioid-related deaths.

Manitoba Health Seniors and Active Living announced that opioid replacement therapy suboxone will now be covered under Manitoba's Pharmacare program.

Through initiations such as the Take-Home Naloxone Program, the provincial government is working with Regional Health Authorities to address these major public health concerns.

SUMMARY

Note: Numbers are subject to change. Missed events in the current report due to a delay of submission to Manitoba Health, Senior and Active Living will be included in later reports when data become available.
