

## AN ORDER OF THE CLEAN ENVIRONMENT COMMISSION

## UNDER THE CLEAN ENVIRONMENT ACT

RE: THE CLEAN ENVIRONMENT COMMISSION and the MANITOBA MOTORCYCLE CLUB, INCORPORATED,  
Applicant,

WHEREAS pursuant to the provisions of The Clean Environment Act, the Manitoba Motorcycle Club, Incorporated filed an application with the Department of Mines, Resources and Environmental Management in connection with the operation of a motorcycle racing track with resultant noise emissions, located at or near River Lots 103 and 104 in the Rural Municipality of St. Andrews;

AND WHEREAS in the absence of limits being prescribed by a Regulation under the said Act, the said application was referred to The Clean Environment Commission for the prescribing of limits;

AND WHEREAS representation was made to the Commission by a person who is, or is likely to be, affected by an Order of the Commission prescribing limits in connection with the said operation;

AND WHEREAS the Commission held a public hearing in Lockport, Manitoba on the 21st day of March, 1977;

AND WHEREAS The Clean Environment Commission considered the application on the 25th day of April, 1977;

IT IS HEREBY ORDERED THAT

1. The Applicant shall ensure that not more than 6 racing events per year are conducted at this site.
2. The Applicant shall ensure that racing events are held only between the hours of 12:00 noon and 6:00 p.m.; and that the total duration of any one racing event does not exceed 5 hours on any one day.
3. The Applicant shall establish and maintain high standards of housekeeping and maintenance at the site of the said operation; and in particular the Applicant shall ensure that:

770517.*

Cont'd . . .

3. (a) no open burning occurs on the site;
  - (b) there is no leakage or discharge of petroleum products or sanitary wastes, and no deposition of any wastes in such a manner as to result in the contamination of soil or groundwater;
  - (c) appropriate containers are in place prior to, during and after racing events, for the collection and storage of waste and litter generated by participants and spectators;
  - (d) all wastes generated prior to, during and after racing events, are collected and conveyed to a waste disposal ground located and operated in compliance with the provisions of Manitoba Regulation 208/76 (being a Regulation under the Clean Environment Act respecting Waste Disposal Grounds).
4. The Applicant shall take adequate measures to control the generation of vehicle raised dust on the property in such a manner that particulate emissions from the said operation do not create a haze in excess of 5 percent opacity at any point beyond the property line of the operation.
  5. The Applicant shall ensure that continuous or intermittent sound emissions from the said operation, measured in the absence of significant interferring noises from any other source, at a point beyond the property line of the said operation and within 15 meters of a dwelling, do not result in an hourly equivalent continuous sound level in excess of 70 dBA.
  6. The Applicant shall ensure that the maximum sound level\* for noise originating from the said operation, as measured at any point beyond the property line of the said operation and within 15 meters of a residence, is not in excess of 85 dBA.

7. The Applicant shall submit to the Environmental Management Division of the Department of Mines, Resources and Environmental Management at least 30 days prior to the commencement of any racing season, a detailed scale drawing showing the location of the motorcycle track and boundaries of the property including distances from the track to the boundaries of the nearest residential and commercial properties.

Order No. 711

Dated at the City of Winnipeg  
this 11th day of MAY, 1977.

Chairman,  
The Clean Environment Commission.

C-b-1640

\*"Maximum sound level" means the maximum sound level as measured using the fast meter response of a sound level meter meeting or exceeding the requirements of Canadian Standards Association Z107.1-1973 for precision or general purpose sound level meters (type 1 or type 2).
