Re: Selkirk Generating Station – Alteration to CEMS Audit and RATA Tests

Dear Marcus Smith:

Thank you for the letter dated September 9, 2020 in which you requested exemption from the annual and biannual tests required to perform Continuous Emission Monitoring Systems (CEMS) audits and the Relative Accuracy Test Audit (RATA). You have indicated that both Units at the Selkirk Generating Station have ceased operation with the anticipated complete shut down of the facility to generate power by January 2021. Your request has been accepted as a Notice of Alteration.

I have reviewed your alteration request and concluded that the environmental effects of the proposed alteration will be insignificant, and, therefore, in accordance with Section 14(2) of The Environment Act your alteration is approved as described in the September 9, 2020 Notice of Alteration. This approval will be conditional on the submission of a decommissioning plan to the Director within one year of the complete closure of the facility.

If you have any questions regarding this matter, please contact Eshetu Beshada, Environmental Engineer, Manitoba Conservation and Climate, at Eshetu.Beshada@gov.mb.ca or 204-250-1932.

Yours sincerely,
