Re: Notice of Alteration – Darlingford, MB – License 1624 RRR – File 3,522.00

Dear Tracey,

This letter is to request constructional approval for the Crop Production Services (Canada) Inc. Darlingford, Manitoba facility, located on the SW ¼ of 9-3-7 WPM near the Town of Darlingford in the Municipality of Pembina.

This application includes:

- A completed Notice of Alteration application,
- The constructional proposal, and
- A CPS site plan drawing.

The target date of construction for this project is July 15, 2017. Please contact me to indicate if you will not be able to review and approve this application in time for this deadline.

If you have any questions regarding this notice of alteration request please direct any questions to myself.

Sincerely,

A handwritten signature in blue ink that reads "Randi Kozak".

Randi Kozak, CRSP
Manager, Operations Compliance
Crop Production Services (Canada) Inc.

Crop Production Services (Canada) Inc.
Darlingford, MB

Site Information

This property is located on the SW ¼ of 9-3-7 WPM near the Town of Darlingford in the Municipality of Pembina and is currently owned by Crop Production Services (Canada) Inc (CPSC).

Changes Within the Development

This Notice of Alteration is to request constructional approval to increase the storage capacity of the site.

At this time, CPSC would like to notify Manitoba Sustainable Development that it intends to install two new Meridian 1620 hopper bottom seed bins which each have a maximum capacity of 100 tonne of various bulk seed. The existing concrete pad will be extended for these new bins.

The current plans are for construction to commence on July 15, 2017.

Maps, Drawings, Site Plans, etc.

A site plan showing the additions in red has been attached for Manitoba Sustainable Development's files.

Identification and Quantification of Changes to the Type or Quantity of Raw Materials or Substances Used or Processed

Total available seed storage will increase from 540 tonne to 740 tonne.

The seed fungicides/insecticides that will be used include the following: Rancona Pinnacle, Cruiser Maxx Vibrance, Evergo, Stress Shield, Consensus, Raxil Pro and Deflect. It is anticipated that approximately 4,000 litres of seed treatment will be used annually.

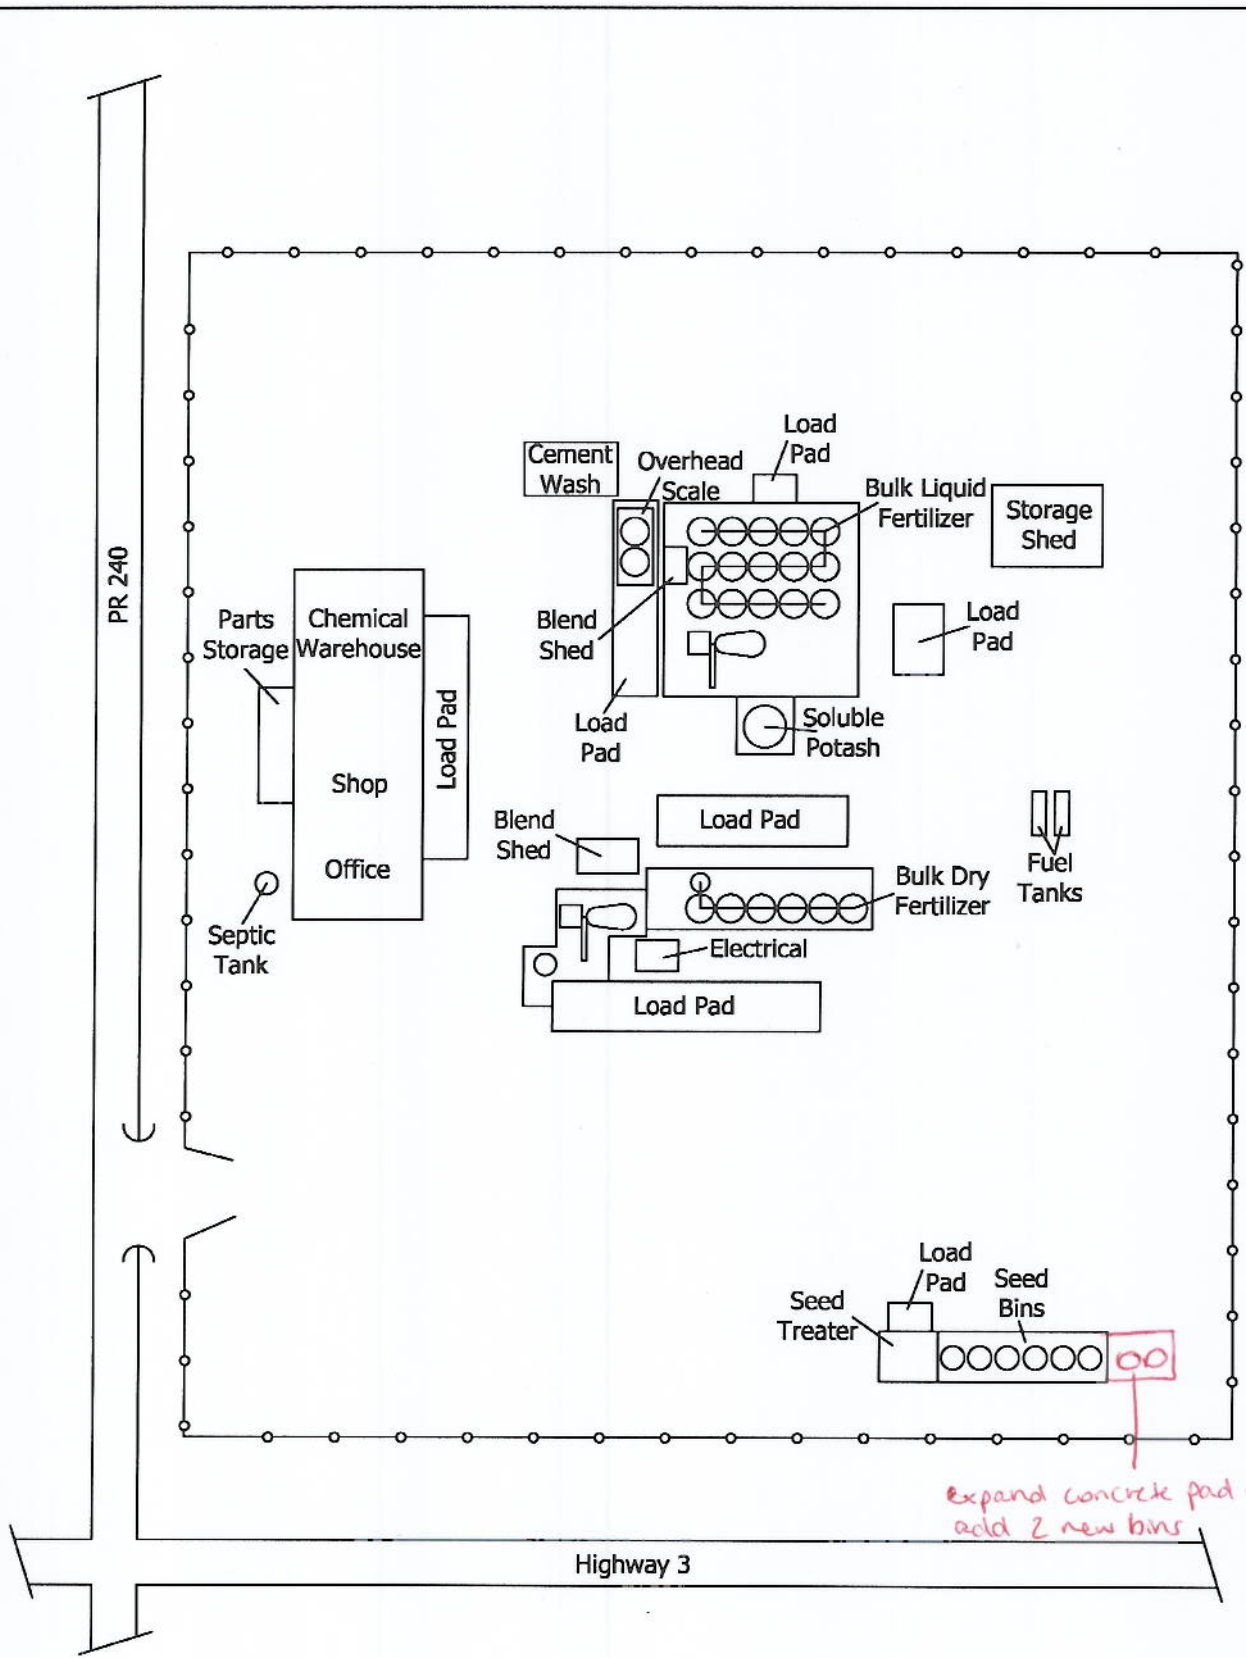

The seed inoculants that will be used include the following: Nodulator Pro, Optimize, So Fast and Nodulator NT.

We are currently treating approximately 16,000 acres worth of soybeans, 5,000 acres worth of wheat, 1,000 acres worth of oats, and 500 acres worth of barley with an anticipated increase in subsequent years.

Quantification of Change in the Environmental Effects as a Result of the Alteration

Respecting treated seed spillage, the existing outload pad, coupled with the timely cleanup of any minor spillage that may occur during normal operation should contain all product.
