Subject: RE: File 5637 EAP-Brookside Site Concrete Batch Plant

Hi Eshetu

In response to your note find the following.

1. The source of water will be well water.
2. Wastewater resulting from washouts would be used for general dust control within the yard site.

Thanks
Derek Walker

Subject: File 5637 EAP-Brookside Site Concrete Batch Plant

Hi Derek,

The public and TAC review for the subject proposal is completed. The following two concerns are raised by TAC members, please address them.

1. The source of water for the operation. (is it City of Winnipeg or water well?)
2. How would you handle the washouts? Please provide a detail on the handling and disposal of the wastewater.

Regards

Eshetu Beshada, PhD, P. Eng.
