Eshetu

Our driller, Friesen Drillers are in the process of obtaining any required licence for us(Maple Leaf).
An exploration permit has been issued for the works, and are waiting for their final report.

Thanks
Derek

Hi Derek,

The water licensing section has few issues they wanted to discuss with you. Please see below the comment from Rob.

Eshetu,

Based on their response, they will need to apply for a water rights licence as I think that they may exceed what is called the Domestic Use Exemption under The Water Rights Act.

Before they do so, however, someone from the company should call me up so I can determine how much water they are likely to use in a year.

If it is determined at that point that they need to apply I will forward an application to them.

Rob

Hi Rob and Laureen,

The concerns you raised after the review of the subject EAP was forwarded to the proponent and the proponent have replied as shown below. Please review the response and let me know if you have further question based on the response.

Regards

Hi Eshetu

In response to your note find the following.

1. The source of water will be well water.
2. Wastewater resulting from washouts would be used for general dust control within the yard site.

Thanks
Derek Walker

Hi Derek,

The public and TAC review for the subject proposal is completed. The following two concerns are raised by TAC members, please address them.

1. The source of water for the operation. (is it City of Winnipeg or water well?)
2. How would you handle the washouts? Please provide a detail on the handling and disposal of the wastewater.

Regards
