Dear Mr. Dufresne:

Re: 6409840 Manitoba Ltd (Tritec Concrete) – Pilot ROC Demonstration

Thank you for your email dated February 24, 2016. You requested to carry out a demonstration of the Rapid Organic Converter (ROC) technology on March 5, 2016 from 1:00 to 3:30 P.M at the Tritec Concrete site. The demonstration is to show the performance of ROC to individuals including the City of Winnipeg Mayor, Councilors and a Winnipeg Free Press reporter. The pilot burning will involve biomass materials and 30 pounds of organic wastes such as rubber product, plastic materials, waste oil/lubricants, textile, paint and cleaning solvents.

Upon review of your request, I have concluded that, due to the duration of the test and the volume of organic materials, the environmental effects of the pilot burning will be insignificant. Therefore, you are authorized to carry out the demonstration as described in the February 24, 2016 request. Please be advised that if more than 30 pounds of the organic wastes is processed, the requirements stipulated in the notice of alteration approval letter dated April 28, 2015 will apply.

If you have any questions regarding this matter, please contact Mr. Eshetu Beshada of this office at (204) 945-7023.

Yours sincerely,
