**Re: Municipal Waste Management – Proposed Cell Construction**

Dear Tim Oliver:

Receipt of your June 15, 2020 design drawings for the proposed expansion cell at the Municipal Waste Management Facility is acknowledged in accordance with Clause 35 of Licence No. 3181.

Upon review of the design drawings, I have concluded they comply with the intent and requirements of the licence, and therefore, you are hereby approved to construct the new waste cell, as submitted, subject to the following terms and conditions:

1. Confirmation to the Environment Officer that the distance from the new cell to property boundaries are in compliance with the buffer zone requirements as set in Schedule B of the Waste Management Facilities Regulation;
2. Notification to the Environment Officer, 5 to 10 days prior to construction initiation, in accordance with Schedule B of the Waste Management Facilities Regulation;
3. Trench stone as indicated on Plan 7 of June 15, 2020 submission must be clean, with no fines and not of a type to deteriorate with exposure to leachate; and
4. All cut off wall integrity, cell base, construction and inspection activities are in accordance with Clauses 38 through 44.

If you have any questions on this matter and to set up the final testing of the constructed cell, please contact Cory Graham, Environmental Engineer, Environmental Approvals Branch at [Cory.Graham@gov.mb.ca](mailto:Cory.Graham@gov.mb.ca) or 204-250-7645.

Sincerely,
