Ms. L. Pyles  
Acting Director, Environmental Approvals Branch  
Manitoba Conservation and Climate  
EABDirector@gov.mb.ca

Dear Ms. Pyles:

**POINTE DU BOIS GENERATING STATION – SHORT-TERM EXTENSION LICENCE**

We request a Third Short-Term Extension Licence (STEL) for the Pointe du Bois Generating Station under the provisions of Section 92(6) of Water Power Regulation 25/88R. The Second STEL was issued for a five-year term covering the period from January 1, 2017 to January 1, 2022. We request that the STEL be renewed for an additional five-year term. The only change requested is a reduction in the installed capacity, indicated in Section 2 of the Fourth Renewal Licence, to 89,200 horsepower (down from 114,000 horsepower) with the removal of Units 3, 5, 7, and 11.

Manitoba Hydro intends to submit the technical requirements for completing the Fifth Renewal Licence for Pointe du Bois Generating Station to Manitoba Conservation and Climate within the term of the next STEL.

Manitoba Hydro continues to operate the Pointe du Bois Generating Station in compliance with the Second STEL. The supporting documentation provided in 2016 prior to issuance of the Second STEL is still valid and ongoing compliance with the licence is documented in our Annual Water Levels and Flows Compliance Report.

If you have any questions about this matter, please call me at (204) 360-3018.

Yours truly,

W.V. Penner, P.Eng  
Manager, Waterway Approvals and Monitoring Department
